

Another Michigan Micro Brewery Goes Solar!

Brewery Vivant in Grand Rapids Michigan just turned on their 58 Kilowatt Solar Photovoltaic System. They are now the 3rd Micro-Brewery in Michigan to go solar guided by Renovo Energy Systems. CBS Solar is excited to be the installation and systems design element of Renovo Energy. This is our third collaborative Micro Brewery Project in as many years; included Dark Horse Brewing Company in Marshall Michigan, Shorts Brewery in Elk Rapids and now Brewery Vivant in Grand Rapids!

Brewery Vivant is a LEED Silver Certified Micro Brewery set in the historic setting just east of downtown Grand Rapids in the East Hills area. Our team, CBS Solar, Green Brewery Project, and J2 Roofing Systems operate collaboratively as Renovo Energy Inc. Our efforts are to provide cost effective, artfully designed solar systems that enhance the sustainable, clean energy goals of the Micro Brewery Industry in Michigan and the Midwest.

For further information contact B. Allan O'Shea at CBS Solar in Copemish Michigan. Please call: 231-378-2936 or e-mail: Allan@cbssolar.com
