Letter of Recommendation for **CBS Solar**

To whom it may concern:

It is my pleasure to provide this recommendation for CBS Solar. As the Director of Sustainability at Interlochen Center for the Arts, I have had the pleasure of working with CBS Solar during the installation of our 4-panel array at our campus RB Annis Botanical Laboratory in 2017. Their involvement in this project has left a lasting impression on our team and has contributed to our campus-wide sustainability goals.

From the onset, they displayed a remarkable level of professionalism and courtesy, which made the entire process seamless. They excelled in communication, ensuring that all necessary paperwork was efficiently handled between our electric company provider and our institution. This attention to detail greatly alleviated any potential stress that could have arisen during the installation process.

In addition to their strong organizational skills, CBS Solar worked exceptionally well with our maintenance staff. They ensured that the installation and subsequent maintenance of our solar array were handled professionally and with the comfort of a personal touch. Their ability to collaborate with others is commendable and speaks to their character and work ethic.

CBS Solar was our first choice for solar installation, and the experience we have had since then has been positive. Our solar panels have aided us in achieving our sustainability objectives, and we have been thrilled with the performance of the system. Furthermore, CBS Solar went above and beyond by leading an educational session for our high school students on solar and alternative energy. Their enthusiasm and knowledge inspired our youth to explore the possibilities within the solar energy field, demonstrating their commitment not only to their work but also to community engagement and education.

I am pleased to recommend CBS Solar without reservation. Their exceptional skills, professionalism, and passion for sustainability would make them a valuable partner to Interlochen Center for the Arts. Please feel free to contact me at your convenience if you require any further information.

Sincerely,

Sincerely,
Emily M. Umbarger
