To Whom It May Concern,

I am writing this letter of recommendation for CBS Solar, a company that partnered with Habitat for Humanity Grand Traverse Region to provide solar solutions for the Habitat's homes located at the Depot Neighborhood. It is with great pleasure that we share our positive experience working with CBS Solar, as they demonstrated exceptional professionalism, expertise, and commitment throughout the entire process.

CBS Solar was engaged to install solar systems that would help provide sustainable energy solutions for Habitat for Humanity homes within the Depot Neighborhood. From the initial consultation to the final installation, CBS Solar's team showed a deep understanding of our needs and made the process seamless. Their knowledge of solar technology, along with their ability to tailor solutions specific to our homes, ensured that we received a high-quality, energy-efficient result.

Throughout the course of the project, CBS Solar's team was punctual, organized, and communicative. They kept us updated at each stage, from design to installation, and worked collaboratively with our team to ensure minimal disruption to the neighborhood. The professionalism they demonstrated made the entire process a smooth and efficient experience.

In addition to their technical expertise, CBS Solar has a strong commitment to sustainability and community impact, values that align closely with Habitat for Humanity's mission. Their contribution to the Depot Neighborhood project has not only provided clean energy but also contributed to the long-term well-being of the families who will benefit from these homes.

We are grateful for CBS Solar's partnership, and we would highly recommend their services to anyone seeking solar solutions. They are a reliable and knowledgeable company that is dedicated to making a positive impact on both the environment and the community.

If you have any questions or would like further details about our experience working with CBS Solar, please feel free to contact me directly.

Sincerely,

Angela Skeans, Director of Operations
Habitat for Humanity Grand Traverse Region
