PRESS RELEASE

SHORT'S BREWING COMPANY GOES SOLAR

Elk Rapids, MI-CBS Solar is pleased to announce that U.S. Senator Debbie Stabenow, ranking member of the U.S. Agriculture Committee, will be attending the Short's Brewing Company ribbon cutting ceremony for their new 40kw solar system. Senator Stabenow is a strong supporter of Michigan products and Michigan jobs. The ribbon cutting ceremony will be held Friday, August 14, 2015 at 1:45pm at the Brewery at 211 Industrial Park in Elk Rapids.

A team of solar designers, engineers and manufacturers just completed the 40kw solar electric project at Short's Brewing Company. CBS Solar and Renovo Energy, led by The Green Brewery Project of Ann Arbor, designed and implemented this system to help reduce costs for the Brewery's manufacturing operation.

The 40KW solar project will utilize net metering to the Consumers Energy power grid and provide approximately 15% of all the electricity used in the Short's manufacturing and production facilities. It is exciting to see Michigan companies coming together, providing energy relief for a Michigan based manufacturer using Michigan products. CBS Solar is pleased to be part of this innovative clean energy development.

For more information on this project or the ribbon cutting ceremony, call Allan O'Shea at 231-378-2936 or 231-510-1817.
